Attorney Docket: Q48500

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the

application:

LISTING OF CLAIMS:

1. (previously presented): A granular pesticidal composition coated with a thermosetting

resin selected from the group consisting of a polyurethane resin and an epoxy resin, wherein

when the thermosetting resin is a polyurethane resin, the granular pesticidal composition is

obtainable by the method according to claim 6, and when the thermosetting resin is an epoxy

resin, the granular pesticidal composition is obtainable by the method accord to any one of

claims 16-18.

2. (original): The granular pesticidal composition according to claim 1, wherein the

thermosetting resin is a polyurethane resin.

3. (previously presented): The granular pesticidal composition according to claim 1,

wherein the thermosetting resin is present in a proportion of from 0.5 to 15 parts by weight based

on 100 parts by weight of a pesticidal active ingredient-containing granule to be coated.

4. (canceled).

5. (previously presented): The granular pesticidal composition according to claim 1,

wherein the thermosetting resin has a water absorption ratio of not more than 5%.

U.S. Application No.: 08/987,380

Attorney Docket: Q48500

6. (previously presented): A method for manufacturing a granular pesticidal composition

coated with a polyurethane resin, comprising the steps of (a) adding a mixture containing 0.05 to

1.5 parts by weight of (1) polyisocyanate having tri- or higher isocyanate groups and polyol, (2)

polyisocyanate and polyol having tri- or higher hydroxy groups, or (3) polyisocyanate having tri-

or higher isocvanate groups and polvol having tri- or higher hydroxy groups for preparing a

thermosetting resin to 100 parts by weight of a pesticidal active ingredient-containing granule to

be coated; and (b) repeating step (a).

7. (previously presented): The granular pesticidal composition according to claim 2,

wherein the thermosetting resin is present in a proportion of from 0.5 to 15 parts by weight based

on 100 parts by weight of a pesticidal active ingredient-containing granule to be coated.

8-9. (canceled).

10. (previously presented): A granular pesticidal composition according to claim 2,

wherein the thermosetting resin has a water absorption ratio of not more than 5 %.

11. (previously presented): A granular pesticidal composition according to claim 3,

wherein the thermosetting resin has a water absorption ratio of not more than 5%.

12. (canceled).

U.S. Application No.: 08/987,380

Attorney Docket: Q48500

13. (previously presented): A granular pesticidal composition according to claim 7,

wherein the thermosetting resin has a water absorption ratio of not more than 5%.

14-15. (canceled).

16. (withdrawn): A method for manufacturing a granular pesticidal composition coated

with an epoxy resin, comprising the steps of (a) adding a mixture containing 0.05 to 1.5 parts by

weight of phenol or alcohol and epichlorohydrin for preparing the epoxy resin to 100 parts by

weight of the pesticidal active ingredient-containing granule to be coated; and (b) repeating step

(a).

17. (withdrawn): A method for manufacturing a granular pesticidal composition coated

with an epoxy resin, comprising the steps of (a) adding a mixture containing 0.05 to 1.5 parts by

weight of carboxylic acid and epichlorohydrin for preparing the epoxy resin to 100 parts by

weight of the pesticidal active ingredient-containing granule to be coated; and (b) repeating step

(a).

18. (withdrawn): A method for manufacturing a granular pesticidal composition coated

with an epoxy resin, comprising the steps of (a) adding a mixture containing 0.05 to 1.5 parts by

weight of amine, cyanuric acid or hydantoin and epichlorohydrin for preparing the epoxy resin to

100 parts by weight of the pesticidal active ingredient-containing granule to be coated; and (b)

repeating step (a).

U.S. Application No.: 08/987,380

Attorney Docket: Q48500

19. (previously presented): The method for manufacturing a granular pesticidal

composition coated with a polyurethane resin according to claim 6, wherein step (a) comprises

adding a mixture containing 0.05 to 1.5 parts by weight of polyisocyanate having tri- or higher

isocyanate groups and polyol having tri- or higher hydroxy groups for preparing a thermosetting

resin to 100 parts by weight of a pesticidal active ingredient-containing granule to be coated.

20. (new): The granular pesticidal composition according to claim 1, wherein the Tg of

the thermosetting resin is greater than or equal to 57° C.

21. (new): The granular pesticidal composition according to claim 1, wherein the OH

equivalent of the thermosetting resin is less than or equal to 196.
